Judul Skripsi : ANALISIS SAHAM PT MEDIKALOKA HERMINA TBK DI
BURSA EFEK INDONESIA DENGAN MENGGUNAKAN
INDIKATOR RSI DAN MACD DALAM PENGAMBILAN
KEPUTUSAN INVESTASI PADA TAHUN 2024

ABSTRAK

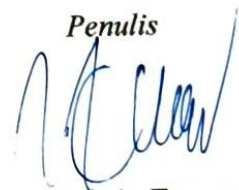

Penelitian ini bertujuan untuk menganalisis sinyal teknikal saham PT Medikaloka Hermina Tbk (HEAL) menggunakan indikator *Relative Strength Index (RSI)* dan *Moving Average Convergence Divergence (MACD)* selama periode 2024.

Metode penelitian yang digunakan adalah deskriptif kualitatif dengan data sekunder yang diperoleh dari Bursa Efek Indonesia, Yahoo Finance, dan Investing.com. Teknik pengambilan data menggunakan studi kasus dengan data pergerakan harga saham pada tanggal-tanggal yang menunjukkan sinyal beli dan jual PT Medikaloka Hermina Tbk tahun 2024.

Hasil penelitian ini menunjukkan bahwa indikator *Relative Strength Index (RSI)* menghasilkan total 11 sinyal buy, 11 sinyal sell. Sementara indikator *Moving Average Convergence Divergence (MACD)* menghasilkan total 7 sinyal buy, 7 sinyal sell. *Capital gain* dan *Capital loss* menunjukkan indikator *Relative Strength Index (RSI)* menghasilkan total return sebesar Rp. 1.320 atau setara dengan 105%, sedangkan indikator *Moving Average Convergence Divergence (MACD)* mencatat total return sebesar Rp. 620 atau setara dengan 51%. Dan Tingkat akurasi menunjukkan Indikator *Relative Strength Index (RSI)* memiliki tingkat akurasi sebesar 100%, sedangkan *Moving Average Convergence Divergence (MACD)* mencatat gain sebesar 58%. Temuan ini mengindikasikan bahwa indikator RSI dan MACD dapat menjadi alat bantu teknikal yang efektif dalam mendukung pengambilan keputusan investasi pada saham HEAL.

Title : THE ANALYSIS OF PT MEDIKALOKA HERMINA TBK
SHARES ON THE INDONESIA STOCK EXCHANGE
USING RSI AND MACD INDICATORS IN MAKING
INVESTMENT DECISIONS IN 2024

ABSTRACT

This study aims to analyze the technical signals of PT Medikaloka Hermina Tbk (HEAL) shares using the Relative Strength Index (RSI) and Moving Average Convergence Divergence (MACD) indicators during the 2024 period.

The research method used is descriptive qualitative with secondary data obtained from the Indonesia Stock Exchange, Yahoo Finance, and Investing.com. The data collection technique uses a case study with data on stock price movements on dates that show buy and sell signals for PT Medikaloka Hermina Tbk in 2024.

The research method used is descriptive quantitative by utilizing historical data on the price and volume of BRIS shares analyzed through the TradingView platform. The RSI indicator is used to identify overbought and oversold conditions, while transaction volume is used to confirm the strength of market trends. The analysis was carried out on data for the 2021-2024 period by observing the movement of RSI, volume, and price movements simultaneously.

The results showed that the Relative Strength Index (RSI) indicator generated a total of 11 buy signals, 11 sell signals. While the Moving Average Convergence Divergence (MACD) indicator generates a total of 7 buy signals, 7 sell signals. Capital gain and Capital loss shows the Relative Strength Index (RSI) indicator produces a total return of Rp. 1,320 or equivalent to 105%, while the Moving Average Convergence Divergence (MACD) indicator records a total return of Rp. 620 or equivalent to 51%. And the accuracy rate shows that the Relative Strength Index (RSI) indicator has an accuracy rate of 100%, while the Moving Average Convergence Divergence (MACD) recorded a gain of 58%. These findings indicate that the RSI and MACD indicators can be effective technical aids in supporting investment decision making in HEAL shares.

Keywords: Technical, RSI, MACD, HEAL Stock, Investment Decision Making.
