HUBUNGAN PENGETAHUAN AKSEPTOR KB TERHADAP KEPATUHAN
MENGKONSUMSI PIL KB DI TPMB S KECAMATAN BALEENDAH
KABUPATEN BANDUNG TAHUN 2023

Siti Rahmawati 1053221027

ABSTRAK

Salah satu jenis kontrasepsi efektif yang menjadi pilihan dan merupakan salah satu bagian dari program KB saat ini adalah pil KB. Kegagalan akseptor Pil KB dapat disebabkan karena kurangnya kepatuhan akseptor dalam mengkonsumsi Pil KB tersebut. Hasil studi pendahuluan masih terdapat akseptor di TPMB S Kecamatan Baleendah Kabupaten Bandung kadang-kadang lupa mengkonsumsi Pil KB. Penelitian ini bertujuan untuk mengetahui hubungan pengetahuan akseptor KB terhadap kepatuhan mengkonsumsi pil KB di TPMB S Kecamatan Baleendah Kabupaten Bandung. Penelitian ini menggunakan penelitian korelasional (*corelational research*) dengan pendekatan *cross sectional*. Sampel dalam penelitian ini yaitu seluruh akseptor Pil KB di TPMB S Kecamatan Baleendah Kabupaten Bandung sebanyak 37 akseptor (total sampling). Pengumpulan datanya menggunakan kuesioner, analisis datanya menggunakan uji *chi square*. Hasil penelitian menunjukkan bahwa hampir setengahnya akseptor KB pil mempunyai pengetahuan yang kurang baik tentang pil KB sebanyak 15 orang atau 40,5% dan hampir setengahnya mempunyai kepatuhan rendah terhadap konsumsi pil KB sebanyak 18 orang atau 48,6%. Terdapat hubungan pengetahuan akseptor KB terhadap kepatuhan mengkonsumsi Pil KB di TPMB S Kecamatan Baleendah Kabupaten Bandung yang terbukti dari nilai $\rho = 0,032$. Adanya hubungan pengetahuan akseptor KB terhadap kepatuhan mengkonsumsi Pil KB, maka perlunya memberikan edukasi yang menyeluruh tentang pil KB kepada akseptor, dengan menjelaskan cara kerja pil KB, jadwal penggunaan yang tepat, efek samping yang mungkin terjadi, dan pentingnya kepatuhan dalam mengonsumsinya.

Kata Kunci : Pengetahuan, Kepatuhan, Pil KB

***THE RELATIONSHIP BETWEEN KNOWLEDGE OF BIRTH CONTROL
ACCEPTORS AND COMPLIANCE WITH TAKING BIRTH CONTROL PILLS AT
TPMB S IN BALEENDAH SUB-DISTRICT, BANDUNG DISTRICT IN 2023***

Siti Rahmawati 1053221027

ABSTRACT

One type of effective contraception that is an option and is part of the current family planning program is birth control pills. Failure of birth control pill acceptors can be caused by a lack of acceptor compliance in taking the pills. The results of the preliminary study still found that acceptors in TPMB S Baleendah Subdistrict, Bandung Regency sometimes forgot to take birth control pills. This study aims to determine the relationship between knowledge of family planning acceptors and compliance with taking birth control pills at TPMB S, Baleendah District, Bandung Regency. This study used correlational research with a cross sectional approach. The sample in this study were all birth control pill acceptors in TPMB S Baleendah District, Bandung Regency as many as 37 acceptors (total sampling). Data collection using questionnaires, data analysis using chi square test. The results showed that almost half of birth control pill acceptors had poor knowledge about birth control pills as many as 15 people or 40.5% and almost half had low compliance with the consumption of birth control pills as many as 18 people or 48.6%. There is a relationship between knowledge of family planning acceptors and compliance with taking birth control pills in TPMB S Baleendah District, Bandung Regency, which is evident from the value of $p = 0.032$. There is a relationship between knowledge of family planning acceptors and adherence to taking birth control pills, so it is necessary to provide comprehensive education about birth control pills to acceptors, by explaining how birth control pills work, the right schedule for use, possible side effects, and the importance of compliance in taking them.

Keywords: knowledge, adherence, birth control pills
